March 23, 2020

Grace Assessment and Therapy Services is exclusively providing teletherapy services at this time. While we recognize that the services we provide are considered essential by federal and state governments, we have come to the decision that the modality with which these services are rendered is not. Our first priority is the health and safety of our clients.

We at Grace truly value our relationships and work with the families and individuals who seek our services. It is a privilege and an honor to be with you and be allowed into your lives. It is our hope that while the modality may be different, our connection to one another remains the same.

The doctors at Grace have effectively provided teletherapy services for several years. Teletherapy is an alternative to traditional therapy in that it allows the psychologist and client to connect via a HIPAA compliant electronic platform. Grace will be expanding this practice in support of our clients during this time.

We are all in this extraordinary situation together and our goal is to continue to provide quality psychological care to those who may need it most. It is my hope that we as a community will heal and recover, knowing that we have supported and cared for one another in the best ways we know how. Towards that end we at Grace look forward to seeing you online.

Be well,

Dr. Angela M Butler
